## **Student Result**

Student Name: Yash Ganvir

Exam: SANYU\_CLG\_TEST

**Score:** 11.0/60.0

Percentage: 18.33%

## **Question-wise Summary**

| Sr.no | Question   | Selected<br>Answer  | Correct<br>Answer   |
|-------|--|---|---|
| 1     | Who is considered as the creator of JAVA?                          | James<br>Gosling  | James<br>Gosling  |
| 2     | Which of the following statements about the Java language is true? | Java supports only Procedural Oriented Programming approach | Both Procedural and Object Oriented Programming are supported in Java |
| 3     | JRE<br>stands<br>for   | Java<br>Runtime<br>Environment                              | Java<br>Runtime<br>Environment  |
| 4     | Java source files are compiled and converted                       | machine<br>code   | Bytecode  |

| 5  | JVM is<br>for<br>bytecode                                       | a<br>compiler | an<br>interpreter |
|----|---|---------------|-------------------|
| 6  | What is the size of int data type in java?                      | 4 bytes       | 4 bytes           |
| 7  | Which is<br>a valid<br>float<br>literal?                        | 1.23f         | 1.23f             |
| 8  | What is the numerical range of a char in Java?                  | 0 to 256      | 0 to<br>65535     |
| 9  | Which is<br>a valid<br>float<br>literal?                        | 1.23          | 1.23f             |
| 10 | Which of these coding types is used for data type char in Java? | ASCII         | UNICODE           |

|    |  | i .             |                 |
|----|--|-----------------|-----------------|
| 11 | Which of these values can a boolean variable contain?                          | True &<br>False | True &<br>False |
| 12 | Which one of the following is a valid identifier in java?                      | \$x             | x1              |
| 13 | Which operator is used to implement unsigned right shift of an integer?        | >>              | >>>             |
| 14 | Which one of the following is a jump statement in java?                        | jump            | break           |
| 15 | Which of these operators is used to allocate memory to array variable in Java? | new<br>malloc   | new             |

| 16 | Which of the following loops will execute the body of loop even when condition controlling the loop is initially false? | while   | do-while  |
|----|---|---|---|
| 17 | Which of these is necessary condition for automatic type conversion in Java?  | The destination type can be larger or smaller than source type.                             | The destination type is larger than source type   |
| 18 | What is the error in this code? byte b = 50; b = b * 50;  | operator has converted b * 50 into int, which can not be converted to byte without casting. | operator has converted b * 50 into int, which can not be converted to byte without casting. |
| 19 | Which of these is an incorrect array declaration?   | int arr[]; arr = new int[5];  | int arr[]<br>= int [5]<br>new   |

| 20 | Which of these selection statements test only for equality?   | None of<br>the<br>mentioned | switch                |
|----|---|-----------------------------|-----------------------|
| 21 | The standard header is used for variable list arguments () in C.  | <stdio.h></stdio.h>         | <stdarg.h></stdarg.h> |
| 22 | What is the sizeof(int) in a 32-bit C compiler?   | 4byte                       | 4byte                 |
| 23 | What will be the output of the following C function? #include <stdio.h> int main() { int n; for(n = 10; n!=0; n) printf("n = %d", n); return 0; }</stdio.h> | none                        | 10 8 6 4              |

| 24 | What will be the output of the following C function? #include <stdio.h> char *getString() { char *str = "C is a programming Language"; return str; } int main() { printf("%s", getString()); getchar(); return 0; }</stdio.h> | C is a programming Language | C is a programming Language |
|----|---|-----------------------------|-----------------------------|
| 25 | What will be the output of the following C function? #include <stdio.h> char *getString() { char str[] = "Will I Printed C Code"; return str; } int main() { printf("%s", getString()); getchar(); }</stdio.h>                | Compilation error           | Compilation error           |

| 26 | What will be the output of the following C function? )#include <stdio.h> int main() { int a[] = {11, 12, 13, 14, 15, 16}; int *ptr = (int*)(&amp;a+1); printf("%d ", *(ptr-1) ); return 0; }</stdio.h> | 11                   | 16 |
|----|--|----------------------|----|
| 27 | What will be the output of the following C code? #include <stdio.h> enum demo{i,j,k}; int main() { printf("%d",i); }</stdio.h>   | Compilation<br>Error | 0  |

| 28 | What will be the output of the following C code? #include <stdio.h> enum demo{i=10,j,k,l=12}var; int main() { var=i; demo *p=&amp;var printf("%d\n",*p); }</stdio.h> | print<br>some<br>address | compilation error |
|----|--|--------------------------|-------------------|
| 29 | What will be the output of the following C code? #include <stdio.h> enum demo{i=2,j,k,l}; enum inner{a=demo::i,j}; int main() { printf("%d\n",i); }</stdio.h>        | Compilation<br>Error     | Compilation Error |
| 30 | What will be the output of the following C code? #include <stdio.h> int main() { int i=10+3*8/2-3+2; printf("%d",i); }</stdio.h>                                     | 21                       | 21                |
