

Student Result

Student Name: Achal Hiwarkar

Exam: Java Basic with OOP

Score: 11.0/15.0

Percentage: 73.33%

Question-wise Summary

Sr.no	Question	Selected Answer	Correct Answer
1	Which of the following is a primitive data type in Java?	Integer	char
2	Which data type is used to store true or false values?	boolean	boolean
3	Which of these statements about type conversion is correct?	An expression involving byte, int, and short is promoted to long before calculation.	byte can be automatically type converted to int.

4	<p>What is the output of the following code?</p> <pre>int x = 5; System.out.println(x++ + ++x);</pre>	10	11
5	<p>Which of these are selection statements in Java?</p>	if	if
6	<p>What is the return type of a constructor in Java?</p>	no return type	no return type
7	<p>What is the primary purpose of the this keyword in Java?</p>	To refer to the current instance (object) of the class	To refer to the current instance (object) of the class

8	<pre>class Test1 { public static void main(String[] args) { int x = 20; System.out.println(x); } static { int x = 10; System.out.print(x + " "); } }</pre>	10 20	10 20
9	<p>Which of these methods of the String class is used to obtain the length of a String object?</p>	length()	length()
10	<p>What will be the output of the following code?</p> <pre>String s1 = "Hello"; String s2 = "Hello"; System.out.println(s1 == s2);</pre>	true	true

11	<p>Which method is used to compare two strings for equality while ignoring case differences?</p>	equalsIgnoreCase()	equalsIgnoreCase()
12	<p>Which of the following classes is not thread-safe?</p>	StringBuilder	StringBuilder
13	<p>Which operator can be used to concatenate two or more String objects?</p>	+	+
14	<p>Which access modifier makes a member accessible only within its own class?</p>	private	private
